About Khajamastan

Principal Front-End Engineer with 10+ years of experience building high-scale web applications for global product companies. Expert in React and micro front-ends, with a focus on architecting resilient CI/CD pipelines that slash deployment times and boost developer velocity. I specialize in bridging the gap between complex engineering and business impact, ensuring systems are as performant as they are scalable. Key strengths aligned to this role: CD, CI, Frontend Architecture, Node.js.

Skills

Frontend: React, Redux, Mobx, Webpack, HTML/CSS, Material-UI

Backend: JavaScript, Node.js

Testing & DevOps: Docker, Jest, Cypress, CI/CD, CD, CI

AI Tools: Codex, Cline, Copilot

Experience

Oracle
Principal Member Technical Staff
Bangalore, KA
April 2022 - Current (4 years)

- Revamped Redwood-themed notification emails and Alloy customization options, increasing customer engagement by 20%.
- Implemented cross-region disaster recovery workflows to maintain 100% operational continuity during outages.
- Bootstrapped MAUI-based next-gen Identity console, cutting maintenance effort by 40% and accelerating feature delivery by 30%.
- Redesigned MFA sign-on policy to gather customer consent and alert administrators, strengthening security posture.
- Migrated TeamCity pipelines to OCI build systems, unified repositories in OCI DevOps SCM, and automated canary health checks every 15 minutes.
- Consolidated multiple profile experiences into the reusable One My Profile UI, reducing development effort by 60%.
- Integrated Apple as a social identity provider to expand authentication options.
- Delivered UI for National Digital Identity features, including Identity Proofing, Verification Provider, Credential Type, and Digital Wallet workflows.

- Raised React test coverage from 39% to 70% using React Testing Library and Jest while authoring functional requirements with product managers.

Xactly Corp
Senior Software Developer - UI
Bangalore, KA
June 2021 - April 2022 (10 months)

- Migrated front-end builds to Webpack with code splitting, improving load times by 20–30%.
- Led the React and TypeScript Objectives product, bootstrapping the codebase, end-to-end tests, and CI/CD deployments.
- Built the Incent module for incentive compensation using React.js, Node.js, Angular, and Webpack.
- Created a config-driven React framework that accelerates Objectives UI delivery.

Nineleaps
Software Development Engineer II
Bangalore, KA
May 2020 - June 2021 (1 yr 1 mo)

- Migrated legacy apps to a micro front-end architecture via Module Federation for seamless integration.
- Built a config-based React component framework that renders UI from declarative definitions.
- Delivered Vendor Management System modules such as Interview, Onboarding, Performance, and Exit using React.js, Node.js, Webpack, Styled Components, and Cypress.
- Automated build and deployment pipelines to improve development efficiency and application performance.
- Added Cypress-driven unit and end-to-end testing to raise reliability.

PWC
Senior Software Engineer
Bangalore, KA
July 2018 - May 2020 (1 yr 10 mos)

- Led development of a cybersecurity digital risk management dashboard for Fortune 500 clients.
- Migrated a legacy Aurelia application to React to streamline engineering workflows.
- Instituted development best practices that improved code quality across the team.
- Moved the build system to Webpack, cutting bundle size by 50% and improving load times by 30–40%.

Minewhat Inc
Senior Front-End Developer
Bangalore, KA
August 2016 - July 2018 (1 yr 11 mos)

- Owned user experience for an ML-driven e-commerce recommendation platform reporting to the CTO.
- Built recommendation widgets and banners with React.js, MobX, SCSS, and Stylus.
- Created a visual editor for customers to live-edit and theme widgets to match site branding.
- Developed frameworks for sliders, placement tools, inline text editing, and templated SVG banners.

Thrymr Software
UI Developer
Bangalore, KA
February 2015 - August 2016 (1 yr 6 mos)

- Built the iStyle room designer application with a points system using JavaScript, Canvas, Angular, and Fabric.js.
- Developed the Thrymr Internal Portal for collaboration, notifications, attendance, and leave management.
- Maintained a weight-loss program dashboard with recipe authoring, diet planning, and weight tracking features.

Education

Rajiv Gandhi University of Knowledge Technologies
B.Tech in Mechanical Engineering
R.K. Valley, Andhra Pradesh, 2014

Awards

- Won Thrymr Software Spot Award for Best Performance.
- Named 2021 Tech Champion by Nineleaps Technology Solutions.
- Received Nineleaps Feather On the Hat award in January 2021.
